If you have a loss on any unit, production records for all harvested units must be provided. Production that is commingled between optional units will cause those units to be combined.

6. Notice of Damage or Loss

In addition to the notices required in section 8 of the general crop insurance policy if you are going to claim an indemnity on any unit which is not to be harvested or on which harvest has been discontinued, you must give us notice not later than 48 hours:

(1) After the time harvest would normally start; or

(2) After discontinuance of harvest.

For the purposes of section 8 of the general crop insurance policy the representative sample of the unharvested crop must be at least 10 feet wide and the entire length of the field.

7. Claim for Indemnity

a. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total bean production (tons) to be counted;

(3) Multiplying the remainder by the price election; and

(4) Multiplying this result by your share.

b. The total production (tons) to be counted for a unit will include all harvested and appraised production.

(1) The tons of harvested production will be either the total net tons delivered to the processor or broker for which payment was received, as shown on the processor or broker settlement sheet, or will be determined by dividing the dollar amount received from the processor or broker by the contract price for the sieve size or grade factor designated by the actuarial table.

(2) Appraised production to be counted will include:

(a) Unharvested production on harvested acreage and potential production lost due to uninsured causes and failure to follow recognized good bean farming practices;

(b) Not less than the guarantee for any acreage which is abandoned, put to another use without our prior written consent or damaged solely by an uninsured cause; and

(c) Appraised production on unharvested acreage.

(d) If any acreage is not timely harvested, the production to count will be the greater of:

(i) That designated by the actuarial table;

(ii) The appraised production; or

(iii) The dollar amount received from the processor divided by the processor's base contract price per ton.

(e) Appraised production on insured acreage for which we have given written consent to be put to another use unless such acreage is:

(i) Not put to another use before harvest of beans becomes general in the county and is reappraised by us;

(ii) Further damaged by an insured cause and is reappraised by us; or

(iii) Harvested.

8. Cancellation and Termination Dates

The cancellation and termination dates for all states are April 15.

9. Contract Changes

The date by which contract changes will be available in your service office is December 31 preceding the cancellation date.

10. Meaning of Terms

a. *Harvest* means the mechanical picking of bean pods from the vines for the purpose of delivery to the canner or processor.

[53 FR 6560, Mar. 2, 1988, as amended at 53 FR 9100, Mar. 21, 1988; 54 FR 20503, May 12, 1989; 55 FR 1785, Jan. 19, 1990; 62 FR 58624, Oct. 30, 1997]

§ 401.119 Cotton endorsement.

The provisions of the Cotton Crop Insurance Endorsement for the 1990 through 1994 crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

Cotton Endorsement

1. Insured Crop and Acreage

a. The crop insured will be American Upland lint cotton.

b. The acreage insured of skip-row cotton will be the acreage occupied by rows of cotton after eliminating the skipped-row portions.

c. In addition to the cotton not insurable under section 2 of the general crop insurance policy, we do not insure any cotton:

(1) Which is not irrigated and, in the same calendar year, is grown:

(a) Where a hay crop was harvested; or

(b) Where a small grain crop reached the heading stage.

(2) Planted in excess of any mandatory acreage limitations applicable to the farm by any program administered by the United States Department of Agriculture; or

(3) Destroyed, or put to another use in order to comply with other United States Department of Agriculture programs.

d. In lieu of subsection 2.e.(7) of the general crop insurance policy, we do not insure any cotton planted with another spring planted crop.

2. Causes of Loss

The insurance provided is against unavoidable loss of production resulting from the following causes occurring within the insurance period:

a. Adverse weather conditions;

b. Fire;

c. Insects;

d. Plant disease;

e. Wildlife;

f. Earthquake;

g. Volcanic eruption; or

h. If applicable, failure of the irrigation water supply due to an unavoidable cause occurring after the beginning of planting;

unless those causes are excepted, excluded, or limited by the actuarial table or section 9 of the general crop insurance policy.

3. Annual Premium

The annual premium amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting, times any applicable premium adjustment factor for which you may qualify as contained in the actuarial table, because: (1) You have not selected optional units; or (2) You are eligible for good insuring experience discount.

4. Insurance Period

a. In lieu of subsection 7.b of the general crop insurance policy (harvest of the unit), insurance will end upon removal of the cotton from the field.

b. The calendar dates for the end of the insurance period are as follows:

(1) Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson counties, Texas, and all Texas counties lying South thereof.	September 30.
(2) Arizona, California, New Mexico, Oklahoma, and all other Texas counties.	January 31.
(3) All other states	December 31.

5. Unit Division

Cotton acreage that would otherwise be one unit, as defined in section 17 of the general crop insurance policy, may be divided into more than one optional unit, if for each proposed unit:

a. You maintain written, verifiable records of planted acreage and harvested production for at least the previous crop year and production reports based on those records are filed to obtain an insurance guarantee; and

b. Acreage planted to insured cotton is located in separate, legally identifiable sections (except in Florida) or, in the absence of section descriptions (and in Florida), the land is identified by separate ASCS Farm Serial Numbers, provided:

(1) The boundaries of the sections or ASCS Farm Serial Numbers are clearly identified and the insured acreage is easily determined; and

(2) The cotton is planted in such a manner that the planting pattern does not continue into the adjacent section or ASCS Farm Serial Number; or

c. The acreage planted to the insured cotton is located in a single section or ASCS Farm Serial Number and consists of acreage on which both an irrigated and nonirrigated practice are carried out, provided:

(1) Cotton planted on irrigated acreage does not continue into nonirrigated acreage in the same rows or planting pattern; and

(2) Planting, fertilizing and harvesting are carried out in accordance with recognized good dryland and irrigated farming practices for the area.

If you have a loss on any unit, production records for all harvested units must be provided to us. Production that is commingled between optional units will cause those units to be combined. If your cotton acreage is not divided into optional units as provided in this section, your premium amount will be reduced as provided on the actuarial table.

6. Notice of Damage or Loss

For purposes of section 8 of the general crop insurance policy the representative sample of the unharvested crop must be at least 10 feet wide and the entire length of the field.

7. Claim for Indemnity

a. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of cotton to be counted (see subsection 7.b.);

(3) Multiplying the remainder by the price election; and

(4) Multiplying this product by your share.

b. The total production to be counted for a unit will include:

(1) All harvested production; and

(2) All appraised production which will include:

(a) Mature and potential production on unharvested acreage;

(b) Unharvested production on harvested acreage and potential production lost due to uninsured causes and failure to follow recognized good cotton farming practices;

(c) Not less than the applicable guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause; and

(d) Not less than 25 percent of the production guarantee per acre for any acreage of cotton that is immature when we determine that harvest of cotton becomes general in the county.

(e) Production on insured acreage for which we have given written consent to be put to another use, unless such acreage is:

(i) Not put to another use before harvest of cotton becomes general in the county and is reappraised by us;

(ii) Further damaged by an insured cause and is reappraised by us; or

(iii) Harvested; and

(f) Production of not less than the harvested guarantee on acreage where the stalks have been destroyed without our written consent.

c. When mature cotton (harvested or unharvested) has been damaged solely by insured causes, the production to count will be reduced if, on the date the final notice of loss is given by the insured, the price quotation for cotton of like quality (price quotation ''A'') for the applicable growth area is less than 75 percent of price quotation ''B.'' Price quotation ''B'' will be that day's growth area price quotation for the same area for cotton of the grade, staple length, and micronaire reading shown by the actuarial table for this purpose. The pounds of production to be counted will be determined by multiplying the number of pounds (harvested and appraised) of mature cotton by price quotation ''A'' and dividing the result by 75 percent of price quotation ''B.''

8. Cancellation and Termination Dates

The cancellation and termination dates are:

State and County:	
Val Verde, Edwards, Kerr, Kendall, Bexar, Wilson, Karnes, Goliad, Victoria, and Jackson Counties, Texas, and all Texas counties lying south thereof.	February 15.
Alabama; Arizona; Arkansas; California; Florida; Georgia; Louisiana; Mississippi; Nevada; North Carolina; South Carolina; and El Paso, Hudspeth, Culberson, Reeves, Loving, Winkler, Ector, Upton, Reagan, Sterling, Coke, Tom Green, Concho, McCulloch, San Saba, Mills, Hamilton, Bosque, Johnson, Tarrant, Wise, Cooke Counties, Texas, and all Texas counties lying south and east thereof to and including Terrell, Crockett, Sutton, Kimble, Gillespie, Blanco, Comal, Guadalupe, Gonzales, De Witt, Lavaca, Colorado, Wharton, and Matagorda Counties, Texas.	March 31.
All other Texas counties and all other States.	April 15.

9. Contract Changes

The date by which contract changes will be available in your service office is December 31 preceding the cancellation date for counties with an April 15 cancellation date and November 30 preceding the cancellation date for all other Counties.

10. Late Planting and Prevented Planting

(a) In lieu of subparagraphs 2.e.(4) and 21.o. of the General Crop Insurance Policy (§ 401.8), insurance will be provided for acreage planted to cotton during the late planting period (see subparagraph (c)), and acreage you were prevented from planting (see subparagraph (d)). These coverages provide reduced production guarantees for such acreage. The reduced guarantees will be combined with the production guarantee for timely planted acreage for each unit. The premium amount for late planted acreage and eligible prevented planting acreage will be the same as that for timely planted acreage. For example, assume you insure one unit in which you have a 100 percent (100%) share. The unit consist of 150 acres, of which 50 acres were planted timely, 50 acres were planted 7 days after the final planting date (late planted), and 50 acres are unplanted and eligible for prevented planting coverage. To calculate the amount of any indemnity which may be due to you, the production guarantee for the unit will be computed as follows:

(1) For timely planted acreage, multiply the per acre production guarantee for timely planted acreage by the 50 acres planted timely;

(2) For late planted acreage, multiply the per acre production guarantee for timely planted acreage by ninety-three percent (0.93) and multiply the result by the 50 acres planted late; and

(3) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by thirty-five percent (0.35) and multiply the result by the 50 acres eligible for prevented planting coverage.

The total of the three calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 150 acres in the unit.

(b) You must provide written notice to us if you were prevented from planting (see subparagraph 11.(k)). This notice must be given not later than three (3) days after:

(1) The final planting date if you have unplanted acreage that may be eligible for prevented planting coverage; and

(2) The date you stop planting within the late planting period on any unit that may have acreage eligible for prevented planting coverage.

(c) Late Planting.

(1) For acreage planted after the final planting date but on or before 25 days after

the final planting date, the production guarantee for each acre will be reduced for each day planted after the final planting date by:

(i) One percent (.01) for the first through the tenth day; and

(ii) Two percent (.02) for the eleventh through the twenty-fifth day.

(2) In addition to the requirements of section 3 (Report of Acreage, Share, and Practice (Acreage Report)) of the General Crop Insurance Policy (§ 401.8), you must report the dates the acreage is planted within the late planting period.

(3) If planting of the cotton continues after the final planting date, or you are prevented from planting cotton during the late planting period, the acreage reporting date will be the later of:

(i) The acreage reporting date contained in the Actuarial Table; or

(ii) Five (5) days after the end of the late planting period.

(d) Prevented Planting (including Planting After the Late Planting Period).

(1) If you were prevented from planting cotton (see subparagraph 11.(k)), you may elect:

(i) To plant cotton during the late planting period. The production guarantee for such acreage will be determined in accordance with subparagraph 10.(c)(1);

(ii) Not to plant this acreage to any crop that is intended for harvest in the same crop year. The production guarantee for such acreage which is eligible for prevented planting coverage will be thirty-five percent (0.35) of the production guarantee for timely planted acres. For example, if your production guarantee for timely planted acreage is 700 pounds per acre, your prevented planting production guarantee would be equivalent to 245 pounds per acre (700 pounds multiplied by 0.35). This section does not prohibit the preparation and care of the acreage for conservation practices, such as planting a cover crop, as long as such crop is not intended for harvest; or

(iii) To plant cotton after the late planting period. The production guarantee for such acreage will be thirty-five percent (0.35) of the production guarantee for timely planted acres. For example, if your production guarantee for timely planted acreage is 700 pounds per acre, your prevented planting production guarantee would be equivalent to 245 pounds per acre (700 pounds multiplied by 0.35). Production to count for such acreage will be determined in accordance with subparagraphs 7.b. and c.

(2) In addition to the provisions of section 7 (Insurance Period) of the General Crop Insurance Policy (§ 401.8) and subparagraph 11.(b) (Meaning of Terms) of this endorsement, the beginning of the insurance period for prevented planting coverage is the sales closing date designated in the Actuarial Table for cotton.

(3) The acreage to which prevented planting coverage applies will be limited as follows:

(i) Eligible acreage will not exceed the greater of:

(A) The number of acres planted to cotton on each ASCS Farm Serial Number during the previous crop year (adjusted for any reconstitution which may have occurred prior to the sales closing date);

(B) The ASCS base acreage for cotton reduced by any acreage reduction applicable to the farm under any program administered by the United States Department of Agriculture; or

(C) One hundred percent (100%) of the simple average of the number of acres planted to cotton during the crop years that were used to determine your yield;

unless we agree in writing, prior to the sales closing date, to approve acreage exceeding this limit.

(ii) Acreage intended to be planted under an irrigated practice will be limited to the number of acres properly prepared to carry out an irrigated practice.

(iii) A prevented planting production guarantee will not be provided for:

(A) Any acreage that does not constitute at least 20 acres or 20 percent (20%) of the acres in the unit whichever is less;

(B) Land for which the Actuarial Table does not designate a premium rate unless you submit a written request for coverage for such acreage prior to the sales closing date for cotton in the county. Upon your timely written request, we will provide a written insurance offer for such acreage;

(C) Land used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by the United States Department of Agriculture;

(D) Land on which any crop, other than cotton, has been planted and is intended for harvest, or has been harvested in the same crop year; or

(E) Land which planting history or conservation plans indicate would remain fallow for crop rotation purposes.

(iv) For the purpose of determining eligible acreage for prevented planting coverage, acreage for all units will be combined and be reduced by the number of cotton acres timely planted and late planted. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage is located in a single ASCS Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of cotton on one optional unit and 40 acres of cotton on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres eligible for prevented planting coverage minus 100 acres planted equals zero). If you report more cotton acreage under this contract than is eligible for prevented planting coverage, we will allocate the eligible acreage to insured units based on the number of prevented planting acres and share you reported for each unit.

(4) When the ASCS Farm Serial Number covers more than one unit, or a unit consists of more than one ASCS Farm Serial Number, the covered acres will be pro-rated based on the number of acres in each unit or ASCS Farm Serial Number that could have been planted to cotton in the crop year.

(5) In accordance with the provisions of section 3 (Report of Acreage, Share, and Practice (Acreage Report)) of the General Crop Insurance Policy (§ 401.8), you must report any insurable acreage you were prevented from planting. This report must be submitted on or before the acreage reporting date, even though you may elect to plant the acreage after the late planting period. Any acreage you report as eligible for prevented planting coverage which we determine is not eligible will be deleted from prevented planting coverage.

(6) If the amount of premium you are required to pay (gross premium less our subsidy) for the prevented planting acreage exceeds the prevented planting liability on a unit, prevented planting coverage will not be providing for that unit (no premium will be due and no indemnity will be paid for such acreage).

11. Meaning of Terms

(a) *Cotton*—only American Upland Cotton.

(b) *Crop year*—the period beginning at planting and extending through the end of the insurance period shown in section 4 and is designated by the calendar year in which the crop is normally planted.

(c) *Days*—calendar days.

(d) *Final planting date*—the date contained in the Actuarial Table by which the insured cotton must initially be planted in order to be insured for the full production guarantee.

(e) *Growth area*—a geographic area designated by the Secretary of Agriculture for the purpose of reporting cotton prices.

(f) *Harvest*—the removal of the seed cotton on each acre from the open cotton boll or the severance of the open cotton boll from the stalk by either manual or mechanical means.

(g) *Irrigated practice*—a method of producing a crop by which water is artificially applied during the growing season by appropriate systems, and at the proper times, with the intention of providing the quantity of water needed to produce at least the yield used to establish the irrigated production guarantee on the irrigated cotton acreage.

(h) *Late planted*—acreage during the late planting period.

(i) *Late planting period*—the period which begins the day after the final planting date for cotton and ends twenty-five (25) days after the final planting date.

(j) *Mature cotton*—cotton which can be harvested either manually or mechanically and will include both unharvested and harvested cotton.

(k) *Prevented planting*—inability to plant cotton with proper equipment by:

(1) The final planting date for cotton in the county; or

(2) The end of the late planting period.

You must have been unable to plant cotton due to an insured cause of loss which is general in the area (i.e., most producers in the surrounding area are unable to plant due to similar insurable causes) and which occurs between the sales closing date and the final planting date or within the late planting period.

(l) *Production guarantee*—the number of pounds determined by multiplying the approved yield per acre by any applicable yield conversion factor for the row pattern planted, multiplied by the coverage level percentage you elect.

(m) *Skip-row*—planting patterns consisting of alternating rows of cotton and fallow rows or rows of another crop (not spring-planted) as defined by ASCS (if non-cotton rows are occupied by another crop any yield factor normally applied for skip-row cotton will not be applicable).

(n) *Timely planted*—cotton planted by the planting date, as established by the Actuarial Table, for cotton in the county to be planted for harvest in the crop year.

[54 FR 48074, Nov. 21, 1989, as amended at 58 FR 67641, Dec. 22, 1993; 60 FR 56934, Nov. 13, 1995]

§ 401.120 Rice endorsement.

The provisions of the Rice Crop Insurance Endorsement for the 1988 through the 1997 crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

Rice Endorsement

1. Insured Crop

a. The crop insured will be rice which is planted for harvest as grain.

b. In addition to the rice not insurable under section 2 of the general crop insurance policy, we do not insure any rice:

(1) Destroyed or put to another use in order to comply with other United States Department of Agriculture programs; or;

(2) Which is not irrigated.

2. Causes of Loss

a. The insurance provided is against unavoidable loss of production resulting from
